## Micro-Lime™ Biologically enhanced liquid Calcium

Are your soils and plants needing a natural boost of calcium, then Micro-Lime might be your solution.

Micro-Lime is a quick easy way of providing a calcium boost to ensure plants and crops have luxury levels of calcium for excellent health, vitality fruit quality and production. Calcium plays a significant roll in raising brix levels because of its ability to promote the uptake of other elements and minerals so a regular application of Micro-Lime will ensure your plants and fruit are of optimum quality, size with maximum shelf life. Micronising is the grinding down of the lime to under 5 microns in size which enables the mineral component to become available within days.

**Ideal for** – for most applications requiring inputs of natural calcium (if using as a soil amendment check your pH first, as gypsum may be a better choice for certain pH soils).

### Benefits

- Easy, convenient application
- Strengthens cell walls. Strong cell walls play a key roll in resisting insect and fungal attack.
- Improves soil structure in tight heavy soils.
- Excellent for soil with excessive magnesium and potassium
- Excellent for spoon feeding light sandy soil
- Fast food source of plant available calcium
- Suitable for most plants, trees, seeds, native & vegies
- where a calcium boost is required without nitrogen

Note: When using with spray tanks, spray tank will require constant agitation to prevent settlement of solids. If Micro-Lime is inadequately diluted or agitated before application it may clog spray equipment. Premix Micro-Lime with equal amounts of water thoroughly prior to adding to filled spray tank under agitation.

 Sizes: 5L, 200L & 1000L

## Micro-Lime™ Biologically enhanced liquid Calcium

### Typical Analysis \* Standard Blend

Calcium	39%
Magnesium	1%
Fulvic Acid	
pH	8.5-10
Appearance	Thick, beige liquid, citrus odour

\* Typical analysis only of bulk concentrate.  
Analysis may vary due to natural inputs and dilution.

### Applications

#### FOLIAR APPLICATIONS

- 2 – 5 Litres per Hectare (20-50mls per 100m<sup>2</sup>) – depending on crop

Note – when applying foliar sprays, a mist spray is ideal (the smaller the droplet size the better) and only apply until light run off (from the plant foliage). Always test spray sensitive foliage prior to applying foliar sprays.

Apply each season or when deficiencies are suspected. Soil & Tissue test to accurately determine requirements.

#### FERTIGATION OR BOOMSPrAYS

- 10-20 litre per Hectare (100-200mls per 100m<sup>2</sup>)

#### LIQUID INJECTION FERTIGATION OR BOOMSPrAYS

- 2 -5 litre per Hectare (50-100mls per 100m<sup>2</sup>)

#### FREQUENCY

- Every 2-4 weeks or as required – crop dependent

#### MINIMUM DILUTION RATES

- 1:100 (10mls per litre)

#### NOTES

- To be used as part of a balanced nutrition program.
- Do not apply during flowering (may leave residue);
- Compatible with most fertilisers including microbe products but jar test first.
- Trial on acid loving plants first.
- Avoid contact with eyes.
- Contains organic and inorganic inputs
- Avoid breathing vapour and wash hands after use.
- Shake or stir well before use
- Store in a cool dry location away from direct sunlight

All recommendations are provided as general advice only. As no control can be exercised over storage, handling, mixing, application, weather, soil or plant conditions, the buyer assumes responsibility for the use of any Plant of Health products. \*Note Analysis may vary slightly due to natural inputs.
