## Natra-Store 4

### Premium input for water penetration, retention & conditioning

Natra-Store 4 has been developed to assist you in maximising water penetration and retention in your soils and mixes.

Natra-Store 4 is made up of

- organic compounds - that hold many times their own weight in water with the
- mineral zeolite - that holds water and houses beneficial microbes and nutrients.
- water crystals - that also contain potash to help with root and shoot development. Plant derived saponins are natural extracts that break down water surface tensions for penetration into dry, hydrophobic soils, mulch and potting mediums.
- Kelp - to hold water, condition soil and reduce plant stress.

**Ideal for** - all applications where you are seeking to increase water penetration and retention.

### Benefits

- Easy, convenient application
- Cost effective- Bulk amounts available
- 4 Products in One
- No more Dry Spots - Conditions soil and plants
- Increased water and fertiliser effectiveness
- Excellent medium for laying turf
- Organic compounds assist in root development
- Ideal for pots or soils, all plants and vegies.

### Premium input for water penetration, retention & conditioning

#### Zeolite

Zeolite is a Greek word that means “boiling stone,” because naturally occurring zeolites are minerals that absorb water that subsequently boils when heated. The technological importance of these materials cannot be overstated. It has the ability to hold water, house microbes and nutrients, condition soil and provide huge surface area to assist elemental exchanges. Plants have been shown to carry zeolite with them as their roots develop and grow. The honeycombed structure also allows zeolite to be used as filtration material in ponds, aquariums and pools. Zeolite is super absorbent as is regularly used to mop up liquid spills and odours.

#### Applications

##### APPLICATION RATES – POTS

Mix with potting mix when planting or poke holes in potting mix with pencil and add Natra-Store 4

- 100mm pots – 1 tablespoon
- 200mm pots – 2 tablespoons
- Hanging basket – 3 tablespoons

Soak pots to charge and re soak after 4 hours

##### APPLICATION RATES – GARDEN BEDS

Poke holes toward root area of plants or mix in with topsoil.

- 1-2 handfuls per square metre

For best results, soak area to charge and resoak after 4 hours. Add mulch if possible.

#### Applications – Cont.

##### APPLICATION RATES – HYDROPHOBIC MULCH

Apply one to two handfuls per square metre and rake deeply into the mulch. Form depressions in the mulch to retain water on garden beds.

##### APPLICATION RATES – LAWNS

- Laying turf – rake into topsoil up to 100grms (1 handful) per square metre thick and apply turf.
- Established turf – apply 100grms per square metre at renovation. Ideally plug aerate your soil and add Natra-Store 4 after, so that it is incorporated into the soil, not sitting on top of the turf.

For best results, soak area to charge and resoak after 4 hours. Add mulch if possible

##### APPLICATION FREQUENCY

- Every three to four months

##### ADDITIONAL POINTS OF NOTE

- To be used as part of a balanced nutrition program.
- Avoid contact with eyes
- Contains organic, inorganic and microbial inputs. Avoid breathing dust and wash hands after use. Wear safety equipment as required.

All recommendations are provided as general advice only. As no control can be exercised over storage, handling, mixing, application, weather, soil or plant conditions, the buyer assumes responsibility for the use of any Plant of Health products. \*Note Analysis may vary slightly due to natural inputs.
