Orchid Boost

Balanced orchid blend, concentrate fertiliser, for regular feeding

Orchid Boost is a high-performance liquid fertiliser that assists the health of the plant and aids in the flowering process.

The orchid family (Orchidaceae) is one of the largest families of flowering plants, estimated at 22000 to 25000 species. In their native habitat, orchids scavenge nutrients from whatever happens to be nearby: decomposing leaves, bird or animal droppings, or minerals borne in rainwater. At Plant of Health (PoH) we recognise the need for a complete liquid fertiliser that promotes the three pillars of plant and soil health (the biological, the physical and the plant / soil chemistry). Orchid Boost fuses NPK (10 / 10 / 10) and minerals with organic compounds, to provide a product that provides outstanding soil and plant nutrition, coupled with minimal leaching and excellent up take. The organic compounds buffer the NPK and support soil fertility, while a range of natural minerals and trace elements delivers complete nutrition to the plant.

Orchid Boost™ can be used as a soil drench (applied to the soil) or applied as a foliar spray (applied to the leaf foliage). Most Orchids prefer small amounts of fertiliser more often, rather than larger doses infrequently.

 Sizes: 500ml, 1L, 5L, 20L, 200L & 1000L

Benefits

- Increased flower and plant strength
- Provides food for soil biology
- Promotes healthy vigorous growth
- Contains minerals & trace elements
- Supports root mass increase
- Supports rich, green, healthy appearance
- Ideal for most domestic and commercial applications
- Will not burn when applied at the recommended rates.

Orchid Boost

Balanced orchid blend, concentrate fertiliser, for regular feeding

Typical Analysis * Standard Blend

Nitrogen in Organic form	0.04%
Nitrogen in Ammonium form	4.65%
Nitrogen as Urea	5.50%
Total Nitrogen	10.19%
Total Phosphorous	10.10%
Potassium as Organic Potassium	0.40%
Potassium as Potassium Phosphate	4.68%
Potassium as Hydroxide	4.98%
Total Potassium	10.06%
Silica	166 ppm
Sulfur	2340 ppm
Iron	1428 ppm
Copper	199 ppm
Zinc	740 ppm
Manganese	607 ppm
Boron	355 ppm
Molybdenum	40 ppm
Specific Gravity	1.3
pH	7.0-7.5
Conductivity	85-105 mS/cm
Solubility	Fully miscible
Appearance	Thin black liquid. Slight smell.

* Typical analysis only of bulk concentrate.
Analysis may vary due to natural inputs and dilution.

Applications

FOLIAR APPLICATIONS

- General Use – 7-10Ls per Hectare (70-100mls per 100m²)

Note – when applying foliar sprays, a mist spray is ideal (the smaller the droplet size the better) and only apply until light run off (from the plant foliage). Always test spray sensitive foliage prior to applying foliar sprays.

ROOT DRENCH

- 5-10Ls per Hectare (50-100mls per 100m²)

APPLICATION FREQUENCY

- General Use – up to every two (2) weeks during the growing season for best results. Can be applied more frequently at lower strength.

MINIMUM DILUTION RATES

- 1:100 (10mls per litre)

ADDITIONAL POINTS OF NOTE

- Not suitable for use with Australian native plants (use standard Triple Boost for natives)
- Do not apply to foliage during flowering – it may stain the flower
- Shake or stir well before use
- Store in a cool dry location away from direct sunlight

All recommendations are provided as general advice only. As no control can be exercised over storage, handling, mixing, application, weather, soil or plant conditions, the buyer assumes responsibility for the use of any Plant of Health products. *Note Analysis may vary slightly due to natural inputs.
