Triple Boost™ Pro - Strength Biologically enhanced 10N 10P 10K liquid fertiliser

Triple Boost™ Pro - Strength is a “state of the art” liquid fertiliser, especially blended for high production agriculture and commercial plant growing.

At Pant of Health (PoH) we recognise the need for a high-performance liquid fertiliser that promotes the three pillars of soil heath (the biological, the physical and the plant / soil chemistry). Triple Boost™ Pro – Strength fuses NPK (10 / 10 / 10) and minerals with organic compounds, to provide a product that provides outstanding soil and plant nutrition, coupled with minimal leaching and excellent up take. The organic compounds buffer the NPK and support soil fertility, while a range of natural minerals and trace elements delivers complete nutrition to the plant. Added trace elements ensures luxury uptake of minerals maintaining mineral balance and plant health. Seaweed is added for plant strength and fungal resistance. Triple Boost™ Pro – Strength is excellent for fruit and vegetables, vines, grains, turf and pastures. Triple Boost™ Pro can be used as a soil drench (applied to the soil) or applied as a foliar spray (applied to the leaf foliage).

Ideal for – Supporting plants through high growth phases.

 **Sizes: 1L, 5L, 20L, 200L & 1000L**

Benefits

- Provides plants and soils with a broad spectrum of nutrients.
- Provides food for soil biology.
- Promotes healthy vigorous growth
- Contains minerals & trace elements
- Supports root mass increase
- Supports rich, green, healthy appearance
- May increase yield and shelf life of crops
- Ideal for most commercial applications
- Excellent for plants in poor soils or potting mix

Triple Boost™ Pro – Strength

Biologically enhanced 10N 10P 10K liquid fertiliser

Typical Analysis * Standard Blend

Nitrogen in Organic form	0.04%
Nitrogen in Ammonium form	4.65%
Nitrogen as Urea	5.50%
Total Nitrogen	10.19%
Total Phosphorous	10.10%
Potassium as Organic Potassium	0.40%
Potassium as Potassium Phosphate	4.68%
Potassium as Hydroxide	4.98%
Total Potassium	10.06%
Silica	166 ppm
Sulfur	2340 ppm
Iron	1428 ppm
Copper	199 ppm
Zinc	740 ppm
Manganese	607 ppm
Boron	355 ppm
Molybdenum	40 ppm
Specific Gravity	1.3
pH	7.0-7.5
Conductivity	85-105 mS/cm
Solubility	Fully miscible
Appearance	Thin black liquid. Slight smell.

* Typical analysis only of bulk concentrate.
Analysis may vary due to natural inputs and dilution.

Applications

FOLIAR APPLICATIONS

- General Use – 5–7Ls per Hectare (50-70mls per 100m²)

Note – when applying foliar sprays a mist spray is ideal (the smaller the droplet size the better) and only apply until light run off (from the plant foliage). Always test spray sensitive foliage prior to applying foliar sprays.

SOIL APPLICATIONS

- General Use / Turf – 5-10Ls per Hectare (50-100mls per 100m²)

APPLICATION FREQUENCY

- General Use – up to every two (2) to three (3) weeks during the growing season for best results
- Contact us for crop specific application rates / frequency (vegetables, orchards, vineyards, broadacre and pasture).

MINIMUM DILUTION RATES

- 1: 100 (10mls per litre) – general applications
- 1: 200 – propagation

ADDITIONAL POINTS OF NOTE

- Works well in conjunction with Organic Link™
- Crop specific applications available
- Not suitable for use with Australian native plants (use standard Triple Boost for natives)
- Minimise foliar application on citrus trees
- Do not apply during flowering
- Shake or stir well before use
- Store in a cool dry location away from direct sunlight

All recommendations are provided as general advice only. As no control can be exercised over storage, handling, mixing, application, weather, soil or plant conditions, the buyer assumes responsibility for the use of any Plant of Health products. *Note Analysis may vary slightly due to natural inputs.
